BioChute Fizzytabs™

Trash Chute and Dumpster Maintenance

Application Instructions:

Container: Purchase a new, wide mouth hand sprayer, or pump type pressure sprayer to use for this product. DO NOT USE THIS SPRAYER WITH OTHER CHEMICALS.

Prepare the liquid: Fill the sprayer with water, and drop in one (1) Bio-Chute™ Fizzytab™ and allow tablet to dissolve. Apply this mixture in one treatment, or, for better results, apply equal amounts on a daily basis.

Application Rate: (based on building levels)

1-3 Levels: ONE (1) Bio-Chute™ Fizzytab™ every 3-5 days

3-10 Levels: ONE (1) Bio-Chute™ Fizzytab™ every 2-3 days

11+ Levels: ONE (1) Bio-Chute™ Fizzytab™ every 1-2 days

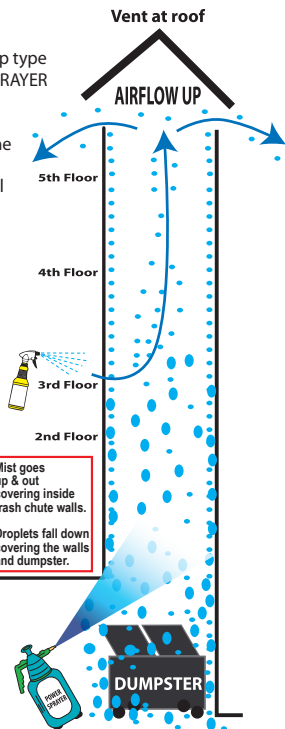

20+ Levels: TWO (2) Bio-Chute™ Fizzytabs™ every 1-2 days

Application rates are approximate. Each building is unique and application rate will vary based on amount of people in the building, temperature, type of waste, and actual spillage in the trash chute.

Application Location:

Daily application of Bio-Chute™ can be applied at the ground floor, from a middle floor, or from the top of the building. Venting air flow will carry some of the product in the fine mist upward throughout the trash chute. Gravity will cause the larger water droplets to fall. For best results, rotate the application site throughout the month.

Bio-Chute™ is also available as a concentrated liquid for locations where automatic application equipment is available or preferred.
